PROPOSITION 10

READ THE OFFICIAL LEGISLATIVE ANALYST REPORT OR GO TO [WWW.PROP10YES.COM](http://WWW.PROP10YES.COM) AND READ THE INITIATIVE. THE SACRAMENTO LOBBYISTS WHO OPPOSE PROPOSITION 10 AREN'T TELLING THE TRUTH.

HERE ARE THE FACTS:

*\* Proposition 10 funds go to California consumers – not “Texas oilmen.”*

Proposition 10 gives rebates directly to California residents for the purchase of clean alternative fuel vehicles; more than a billion dollars for California renewable energy generation projects, including solar and wind; and grants for California colleges and universities.

*\* Proposition 10 will clean our air.*

Studies conducted by the California Air Resources Board found diesel exhaust fumes contribute to thousands of premature deaths from cancer each year and will raise healthcare costs by up to \$200 billion by the year 2020.

Proposition 10 provides \$1 billion to replace the aging, polluting diesel trucks on our roads with clean trucks that run on electricity, hydrogen, natural gas, or other clean alternative fuels.

*\* Proposition 10 provides more money for education – not less.*

Proposition 10 provides \$100 million in grants to California colleges and universities to educate and train workers for green technology jobs. An additional \$500 million is provided for research and development of cheaper and cleaner alternatives to gasoline.

*\* Proposition 10 protects our children and California's future.*

Proposition 10 will ensure our kids breathe cleaner air, are less dependent on foreign oil, have alternatives to gasoline powered vehicles, and use electricity that is generated in California from solar, wind, and other clean renewable sources.

Vote YES on Proposition 10.

Dr. Alan Henderson  
American Cancer Society, California Division  
Past President
